Playing Cards

Playing Cards are a versatile and dynamic components of many tabletop games, offering a multitude of uses and possibilities. They can represent a range of game elements, from characters and items to events and obstacles, and can be used in a variety of ways, such as to create a deck-building game or to add an element of randomness to gameplay.

Playing Cards can be made from various materials, including paper, cardboard, and plastic, and can come in a range of shapes and sizes. They can be designed to match a game's theme, with customized artwork and unique shapes, creating an immersive and engaging gameplay experience.

Metal Coins

Coins are classic and versatile components of tabletop games, providing a tangible way for players to track their in-game wealth or score. They can be made from a range of materials, including metal, plastic, or even wood, and can be designed to look like real-world currency or custom-designed to match the game's theme.

METALCOINS

Beyond their practical use in gameplay, coins can also be collectible items in their own right, with some game enthusiasts amassing entire collections of game coins. Overall, coins are a beloved and versatile component of tabletop games, adding an extra level of immersion, strategy, and fun.

Acrylic Standees

Acrylic Standees are versatile components in tabletop games, used to represent a wide variety of things in the game world, from characters and creatures to resources and power-ups. They are often small, flat objects that can be easily moved around the game board or tracked on a player's individual board.

In addition to their functional purpose, Acrylic standee can also add an element of immersion and engagement to the game experience. Players may enjoy collecting and using standees that represent their favorite characters or resources, and the tactile sensation of handling and moving the standees can add a satisfying level of interaction to the game.

Game Boards

The game board is the heart of many tabletop games, providing a physical space for players to engage with the game world and each other. It is a versatile and dynamic component that can come in many shapes, sizes, and materials, and can be designed to match the game's theme and aesthetic.

Punch Boards

Punch board is a type of game component made from sturdy cardboard or chipboard, often used to represent game tokens or player pieces. The pieces are removed from the board by punching them out.

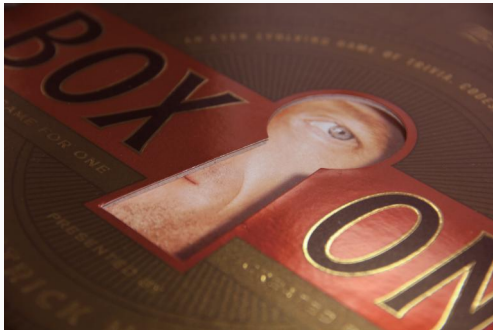

PUNCH BOARDS

Boxes

The game box is more than just a container for storing the game and its components. It is the first point of contact that players have with the game and can play a vital role in setting the tone and building excitement for the gameplay experience.

Gold card paper, UV printing, gold foil, embossing, special die cut on top of the box

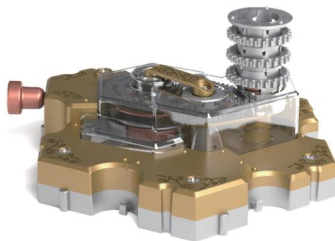

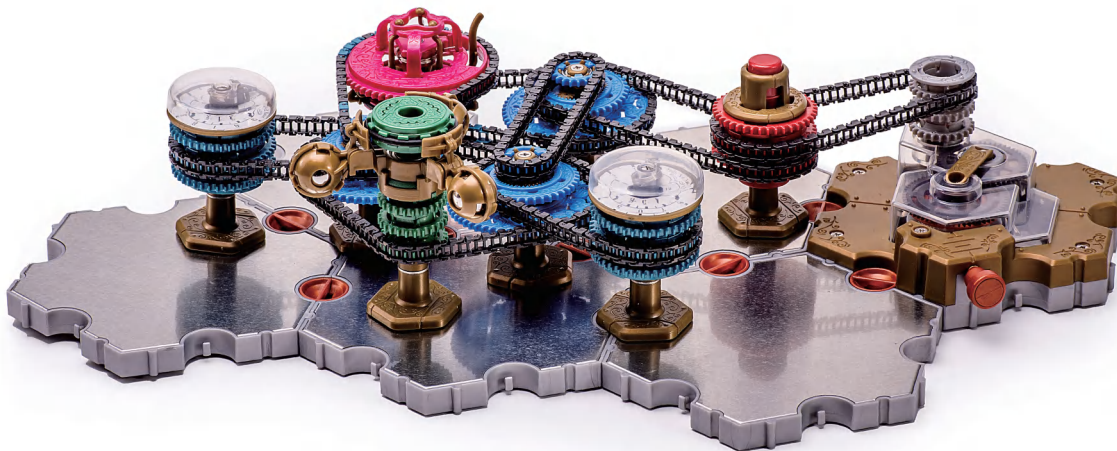

Functions

Game functional mechanisms are the backbone of tabletop game design, providing a framework for how the game functions and creating a unique gameplay experience for players. They can range from simple mechanics like rolling dice to determine outcomes to complex systems that require strategic planning and long-term thinking.
